Soft Wall Cleanroom

The Flexible Solution for Cleanroom Applications

ESCO

WORLD CLASS. WORLDWIDE.

Soft Capsule.

Cleanroom Products • Soft Wall Cleanroom

Esco Experience

As a pioneer in cleanroom technology, since 1978, Esco has been creating controlled environments for the electronics, semiconductors, pharmaceutical, food, biotechnology, nanotechnology and other high technology industries. Today, increasing quality and process demands in these and other industries require the control of particulate contamination to stringent standards.

Esco Soft Capsule Soft Wall Cleanrooms are an ideal solution when clean air areas need to be created on a small to mid scale. Flexible and economical, they may be easily relocated when application requirements change. Esco offers a complete range of soft wall cleanrooms to meet various construction, dimensional and cleanliness class requirements.

Applications

Uses include applications where clean air is required for process and product protection.

- Pharmaceuticals, Grade A filling suites
- Medical devices, plastic injection moulding
- Electronics assembly
- Contact lens packaging
- Hospital pharmacy (USP 797)
- Biotechnology
- Nanotechnology
- Life sciences
- Aerospace
- Quality control
- Food industries

Soft Capsule Soft Wall Cleanroom

Ceiling Grid

- Standard 2' x 4' (1.2 x 0.6m) cleanroom ceiling grid enables flexible placement of fan filter units. Non particulate shedding powder coated steel panels are provided to cover empty bays.

Construction

- Cleanroom-grade construction utilizing full welded, reinforced, steel tubular sections. Structure is finished with an abrasion-resistant oven-baked powder coat. Esco Isocide antimicrobial coating on all painted surfaces minimizes contamination. Entire structure is free-standing and does not require any suspending ceiling supports.

4

Lighting

- Built-in warm white, 5000k lighting provides excellent illumination of the cleanroom and reduces operator fatigue. The reliable lighting system is zero-flicker and instant start. Tear-drop design does not interfere with the laminar flow in the cleanroom.

Side Curtains

- Isostat™ vinyl curtains isolate the cleanroom from the ambient environment, while allowing for easy passage of materials and personnel in and out of the clean area. Vinyl curtains terminate at a specific distance above the floor to allow for exhaust of clean air out of the cleanroom.

Casters

Stainless steel swivel casters feature nonshedding polyurethane wheels. Capacity: 300 lbs. each.

*Soft Capsule Soft Wall Cleanroom ,
Model SC-887.*

Soft Capsule®

Cleanroom Products • **Soft Wall Cleanroom**

■ Control Panel

- Centrally mounted control panel enables rapid startup of fan filter units and lighting.

■ Fan Filter Units

- See page 6 for more details information.

ISOCIDE™ Antimicrobial Powder-Coating

All exterior painted surfaces are powder-coated with Esco Isocide, an antimicrobial inhibitor to minimize contamination. Isocide is integrated into the coating substrate and cannot wash out or diminish by repeated cleaning. Performance results are available upon request. Contact Esco or your Esco Sales Representative for details.

Installation

- The Soft Capsule Cleanroom is shipped unassembled with tools and parts for on-site assembly, turning an existing air-conditioned space into a cleanroom in a matter of hours.

Fan Filter Units

- Esco Airstream Fan Filter Units incorporate German made ebm-papst permanently lubricated, direct drive centrifugal blowers with external rotor designs, and Swedish Camfil-Farr HEPA/ULPA filters.
- The energy efficient external rotor motor design reduces operating costs and has extremely low noise and vibration levels, improving the working conditions in the cleanroom.
- Internal baffles maximize airflow uniformity.
- High quality HEPA filters utilizing an improved mini-pleated separation technique to maximize surface area improves efficiency and extends the filter life. Filters operate at a typical efficiency of >99.99% at 0.1 to 0.3 micron sizes.

Airstream Cleanroom Fan Filter Units
Model FFU-32A-AH-2

- An additional disposable pre-filter on all models traps large particles in the inflow air prior to reaching the main filter, protecting against damage and prolonging life.
- Built-in solid-state variable speed controllers is superior to conventional "step" controllers and offer infinite adjustment from zero to maximum setting.

Options

- All stainless steel construction.
- Leveling feet.
- Complete factory test and certification, including airflow, filter integrity, particle counting, light and noise tests.
- Extensions for existing Soft Capsule cleanrooms.

Warranty

- All Esco Soft Capsule Cleanrooms are covered by a 1 year warranty, excluding consumable parts and accessories. Contact your local Sales Representative for warranty details.

Mini-pleat Separatorless Filter (left) vs. Conventional Aluminium Separator Filter (right)

Esco cabinets use Swedish Camfil Farr® mini-pleat filters without aluminum separators to increase filter efficiency, minimize the chance of leakage, and to prolong filter life. Filters include a lightweight aluminum frame for structural stability and elimination of swelling common to conventional wood frames.

Custom Modular Cleanroom Systems

- Esco custom designs, fabricates and validates modular cleanroom systems to suit application specific requirements. These are examples of some of the custom system we have delivered.

Esco HEPA Filter Efficiency

(%) Maximum and Typical Penetration

• Typical Penetration

This filter efficiency graphs reflect filter efficiencies for HEPA filters with 66mm / 2.6" height for the nominal airflow velocity of 0.45 m/s or 90fpm. Filter efficiency figures change with different airflow settings and filter heights, e.g. filter efficiency will be higher for lower airflow velocities and vice versa.

Esco Centrifugal Fan with External Rotor Motor (left) vs. Conventional Fan with Standard Motor (right)

- Esco cabinets use German made ebm-papst®, permanently lubricated, centrifugal motor/blowers with external rotor designs.
- Integrated blades narrow the profile and eliminate need for a motor shaft.
- Motors are selected for energy efficiency, compact design, and flat profile. The completely integrated assembly optimizes motor cooling.
- All rotating parts are unitized and balanced for smooth, quiet, vibration-free operation.

Soft Wall Cleanroom Filtration System

- Room air is taken in from the top of the cleanroom through a disposable pre-filter with 85% arrestance; this serves to trap larger particles and increase the life of the main filter.
- Air is forced evenly across the HEPA filter(s); the result is a stream of clean laminar air within the work zone; this dilutes and flushes all airborne contaminants from the interior.
- A nominal filter face velocity of 0.45 m/s or 90 fpm ensures that there is a sufficient number of air changes within the cleanroom in order to maintain cleanliness.
- The purified air travels downward within the interior in a vertical, unidirectional stream, and leaves the cleanroom close to floor level at the perimeter.
- The cleanroom is positively pressurized to prevent ingress of airborne contaminants from the external environment.

Model SC, Soft Capsule Soft Wall Cleanroom Technical Specifications

*Other ISO cleanliness classes available. Contact Esco for information.

**Based on 230V/single phase/50Hz (International electrical configurations available)

Installation Procedure

STEP 1

- Assemble the horizontal to vertical bar to form a side frame.

STEP 2

- Assemble side frame with additional vertical beams to form framework.

STEP 3

- Add ceiling bars to form a complete ceiling grid.
- Install tear-drop lighting below the ceiling grid.

STEP 4

- Install fan filter units and cover panels for empty bays.
- Install curtains around the general framework to complete the assembly.

Since 1978, Esco has emerged as a leader in the development of controlled environment, laboratory and pharmaceutical equipment solutions. Products sold in more than 100 countries include biological safety cabinets, compounding pharmacy equipment, containment / pharma products, ductless fume hoods, in vitro fertilization workstations, lab animal research products, laboratory fume hoods, laboratory ovens and incubators, laminar flow clean benches and PCR products and instrumentation. With the most extensive product line in the industry, Esco has passed more tests, in more languages, for more certifications, throughout more countries than any biosafety cabinet manufacturer in the world. Esco remains dedicated to delivering innovative solutions for the clinical, life science, research and industrial laboratory community. www.escoglobal.com.
